A REAL FLESH BUILDER FOR THIN PEOPLE

Who Would Increase Weight And
 Put On Healthy Skin—There Flesh

This man and woman who would
 like to increase their weight with 10 or
 15 pounds of healthy "flesh"—they feel
 should try eating a little Hargol with
 their meals for a while and note results.
 Here is a good test worth trying. First
 weigh yourself and measure yourself.
 Then take Hargol—one tablet with
 every meal—for two weeks. Then
 weigh and measure yourself again. It
 isn't a question of how you look or
 feel or what your friends say and think.
 The scales and tape measure will tell
 their own story. Many people, having
 followed these simple directions, report
 weight increases of from five to eight
 pounds with continued gains under
 further treatment.

Hargol does not of itself make fat,
 but mixing with your food its purpose
 is to help the digestive organs turn the
 fats, sugars and starches of what you
 have eaten into rich, ripe, fat producing
 nourishment for the tissues and blood.
 prepare it is an easily assimilated
 form which the blood can readily accept.
 A great deal of this nourishment now
 passes from this people's bodies as waste.
 Hargol is designed to stop the waste and
 make the fat producing contents of the
 very same meals you are eating now
 develop pounds and pounds of healthy
 flesh between your skin and bones.
 Hargol is non-injurious, pleasant,
 efficient and inexpensive. All leading
 druggists are authorized to sell it in
 large boxes—forty tablets to a package—
 on a guarantee of weight increase or
 money back, as found in every package.
